PROJECT

ACCESS OF LAW TO COMMON PEOPLE USING AI

- Developed an AI-powered system to simplify complex legal documents and provide easy-to-understand explanations for common people.
- Implemented Natural Language Processing (NLP) techniques to summarize laws, extract key sections, and answer user queries.
- Designed a user-friendly interface to make legal information accessible and searchable for the general public.
- Focused on bridging the gap between legal language and everyday understanding, promoting awareness and accessibility of rights.

- Problem : Laws are complex and inaccessible.
- Solution : AI-based system (chatbot + database).
- Impact : Makes law accessible to common people.
